VOLUME 11 1990

SUBJECT INDEX

Abnormal footprints, 451
Acetyl-CoA, 57
Acetyl-l-carnitine, 491, 499
Acetylcholine, 401
Acetylcholinesterase inhibitors, 609
Aerobic fitness, 193
Age, 57
Aging, 21, 29, 39, 47, 105, 111, 117, 131, 139, 151, 159, 175, 185, 193, 201, 217, 223, 229, 237, 359, 371, 381, 391, 395, 409, 417, 425, 433, 437, 457, 481, 491, 499, 515, 529, 537, 555, 563, 567, 573, 583, 591, 615, 619, 625, 631, 659, 663
Alkaline elution, 169
Aluminum, 209, 523
Alzheimer's dementia (SDAT), 359
Alzheimer's disease, 3, 15, 29, 51, 123, 151, 169, 425, 465, 471, 523, 529, 551, 567, 597, 601, 641
Amino acids, 159
Amplitude-intensity slope, 193
Amygdala, 139
Amyloid, 359
Amyloid angiopathy, 359
Amyloidosis, 123
Androgenized rats, 237
Angiotensinogen, 139
Area 4, 201
Associative learning, 659
Astrocytes, 123
ATP, 401
Auditory system, 391
Axonal sprouting, 51

Basal ganglia, 131
$Beta_1$, 591
$Beta_2$, 591
Beta-endorphin, 223
Betz cells, 201
Blood-brain barrier, 371
Blood vessels, 47
Brain, 117, 359, 477, 631, 649
Brain stimulation, 523
Brain trauma, 567

Calcium channel antagonist, 659
Calcium channels, 151, 433
Calpain, 425
Calpastatin, 425
Capillary density, 359
Capillary diameters, 359
Carnitine, 57
Carnitine acetyltransferase, 57
Caudate, 131
Caudate-putamen, 185
Cell counting, 3
Cerebellum, 111, 591
Cerebral blood vessels, 631
Cerebral cortex, 169, 381
Cerebrovascular hyperinnervation, 51
Ceroid-lipofuscinosis, 663
Choline, 401
Choline-acetyltransferase, 507
Cholinergic, 631
Cholinergic neurons, 185
Circadian rhythms, 619
Circular platform, 499
Classical conditioning, 523
Clonidine, 583
CNS capillary microenvironment, 39
CNS plasticity, 29
Cognition, 193, 573
Cognitive behavior, 417
Computed tomography, 21
Computer analysis, 15
Conditioned emotional response paradigm, 139
Copper, 663
Coronary artery disease, 601
Corpus striatum, 395
Cortex, 515
Cortical thickness, 201
Corticosterone, 139
Corticosterone receptors, 139
CT number, 21
Cyclic AMP-dependent protein kinase, 209

D-1 DA receptor, 105
D_2 receptors, 437
DA-sensitive adenylate cyclase, 105
Degeneration, 425
Dementia, 15, 29, 151, 465, 597
Dendrites, 111, 537
Development, 201
Diazepam, 117
Dihydropyridine, 659
1,4-Dihydropyridine, 381
Dihydroxyphenylacetic acid, 131, 437
3,4-Dihydroxyphenylalanine, 131
Disease, 371
DNA breaks, 169
Dopamine, 131, 139, 223, 395, 437, 507
Dopamine receptors, 131
Dopamine synthesis, 131
Down's syndrome, 567
Dye DiI, 649

EEG, 15, 193
EEG power, 15
Enkephalin, 395
Entrainment, 619
Epidemiology, 641
Estrogen, 237
Etiology, 641
Event-related potentials, 193, 471
Excitatory amino acids, 155
Exercise, 555
Eye-blink conditioning, 659

Female and male aged rats, 237
Fiber density, 451
Fischer 344 rats, 139, 631
Fixation, 477
Fluorescence, 649
Food anticipation, 619
Food deprivation, 619
Formaldehyde, 477
Free radicals, 567

Genetics, 567, 641
Gerontology, 201
Glutamate, 597
Growth hormone, 229, 625
Growth hormone-releasing factor, 229
Guanfacine, 583

Heart disease, 601
High-affinity choline uptake, 515
Hippocampus, 39, 139, 381, 515, 551, 649
HLA-DR, 477
Homovanillic acid, 131
5-HT receptors, 437
Human, 649
Human platelets, 57, 615
Huntington's disease, 15
5-Hydroxyindole acetic acid, 437
Hypocaloric diet, 417
Hypothalamus, 139, 217, 409, 529

Immune function, 139
Immunocytochemistry, 217, 551
Immunohistochemistry, 481
Individual differences, 507
Indusium griseum, 551
Intraventricular infusion, 51
Iron, 663

[^{3}H]Ketanserin-vesicular binding sites, 437

Large granular lymphocytes, 139
Lateral superior olivary nucleus, 391
Laterodorsal tegmental nucleus, 185
Learning, 491
Learning and memory, 499
Light-dark adaptation, 105
Lipofuscin, 201
Lipopigments, 663
Luteinizing-hormone releasing hormone, 217

Male and female rats, 229
Male rats, 223, 395
Maternal behavior, 237
Medial frontal cortex, 139
Medial nucleus of the trapezoid body, 391
Medial superior olivary nucleus, 391
Medium spiny I neuron, 537
Membrane receptors, 151
Memory, 491, 583
Metabolism, 117
Microvascular system of the brain, 39
Microvasculature, 381
Microvessels, 359
Molluscs, 457
Monoamine metabolites, 507
Morphometry, 39, 185
Morris' water maze, 417
Mortality, 491
Motor deficits, 451
Mouse, 185, 217, 515

NADPH-diaphorase, 185
Naloxone, 395
Natural killer cells, 139
Neostriatum, 139, 401

Nerve conduction velocity, 451
Nerve growth factor, 51
Nerve growth factor receptor, 481
Neuritic (senile) plaques, 359
Neurodegeneration, 123
Neuroendocrine system, 457
Neuroimmunology, 477
Neuromuscular junction, 555
Neuron, 649
Neuron loss, 391
Neuron shrinkage, 3
Neuronal number, 201
Neuronal plasticity, 111
Neuropathology, 551
Neuropathology of the Alzheimer's type, 601
Neurotoxins, 567
NGF, 175
Nimodipine, 381, 451, 573, 659
Nonhuman primates, 573
Noradrenergic innervation, 47, 95
Norepinephrine, 139, 507, 583
Nucleus accumbens, 139
Nucleus basalis of Meynert, 3, 155

Olfaction, 465, 597
Olfactory dysfunction, 465
Olfactory sensitivity, 465
Olfactory threshold, 465
Omegaconotoxin binding, 433
Onset, 641
Ovariectomy, 237
Ovulation hormone, 457

P300, 471
Paraventricular nucleus, 529
Parietal cortex, 39
Path length, 111
Peptidergic neurons, 457
Peripheral nerve function, 451
Phorbol ester binding, 563
Pituitary enlargement, 625
Plaque-vessel relationships, 359
Positron Emission Tomography, 471
Postmortem, 649
Prenatal, 117
Preoptic area, 217
Prevention, 641
Progesterone, 237
Prolactin, 139, 237
Protein kinase C, 209, 563
Protein phosphorylation, 209
Protein processing, 123
Psychomotor behavior, 417
Purkinje neurons, 111, 591
Putamen, 131

Quantitative, 537
Quantitative autoradiography, 437

Rabbit, 659
Radial 8-arm maze, 499
Radioligand binding, 151
Rat brain, 57
Rat brain areas, 433, 563
Rats, 47, 111, 371, 391, 417, 507
Recent memory, 573
Renin, 139
Reproduction, 457
Restricted diet, 417
Retina, 105, 663
Retrograde, 649
Rhesus monkey, 201, 609
Risk factors, 641
RPE, 663

^{3}H-SCH 23390 binding, 105
Secretory patterns, 229, 625
Senescence, 131
Senile plaques, 601
Sensory-motor, 491
Septum, 481
Serine protease inhibitor, 123
Serotonin, 139, 223, 437, 507
Serotonin uptake sites, 615
Somatostatin, 229
Somatostatin mRNA, 409
Spatial delayed response, 609
Spatial learning, 507
Spatial memory, 417
Spinal cord, 47
Sprouting, 175
Stereology, 3
Stress, 139
Striatum, 131, 159, 537
Superior olivary complex, 391
Suprachiasmatic nucleus, 529
Supraoptic nucleus, 95, 529
Sympathetic neurons, 175
Synapses, 29
Synaptic density, 29
Synaptic plasticity, 555

T lymphocytes, 139
T-maze, 499
Target hippocampus, 175
Taste, 597
Thyrotropin, 229, 625
Thyrotropin-releasing hormone, 229
Transmitter release, 555
Transplantation, 175
Twin studies, 641

Ultrastructure, 371, 381
14-Unit T-maze, 499

Vascular morphometry, 359
Vascular reactivity, 631
Vasculature, 371
Vasopressin, 95
Vincamines, 39
Visual cortex, 359
Visual recognition memory, 609
$\mathring{V}O_{2max}$, 193

Water balance, 95
Working memory, 515

X-ray microanalysis, 663

Young and aged rats, 401

Zinc, 663

AUTHOR INDEX

Abraham, C. R., 123
Akiguchi, I., 185
Alafuzoff, I., 425
Albert, M., 21
